PENNANTS ONLY FOR WORLD SERIES

Decision by Baseball Commission—Swede Easily Makes New Indoor Marathon Record—Another Indoor Baseball Victory for C. A. C.

Cincinnati, O., March I.—Only players and teams contesting in the world's championship series hereafter will be awarded pennants and emblems by the National Baseball commission, according to announcement made by that body late today. Hitherto all series between National and American league teams under the auspices of the commission have been so noticed.

The division of receipts from these bye-series is hereafter to be made up on the same basis as the world's series, instead of allowing the interested clubs to divide the money as they may

clubs to divide the money as they may see fit.

At the instance of President Murphy of the Chicago National league club, a change was also made in the drafting rules by which minor league clubs are given five days in which to accept or reject offers of the return of a drafted player until the player is about to be disposed of to a minor league of the same class.

The application of William Dwyer, a first baseman, to be declared a free agent because of repeated purchases and releases of his contract between the Chicago American jeague club and the Des Moines management, was rejected. Dyer claimed he was being "covered up," but the commission held that the testimony was against this contention.

SCANTY OFFERINGS TO SELL. This Made It Easy for Professionals to Bid Up Prices.

New York, March 1 .- Favorable in-New York March 1.—Favorable inferences might be drawn of the confidence felt by holders of stocks from the scanty offerings to sell in the market today. It was this lightness of the supply which made it easy for the professionnal traders to bid up prices without being obliged to accept any great amount of stock. The demand was small an was confined elmost wholly to this professional trading element. The news bearing on security values did not seem to be considered of sufficient importance to prompt any large shifting of position in the market on the part of the more substantial inside interests. The attitude of wafting was maintained on their part. The absence of winter valcations of many persons accepted as leaders of suthority in finance and in market movements is a feature of the position.

suthority in finance and in market movements is a feature of the position.

The annual report of the Pennsylvania railroad was studied with the usual interest, by reason of its vast scope and representative character. The profitable results of last year's busines had an important indiuence in sustaining confidence and in the firm undertone of the day's market. Not only past results recorded, but the plans outlined for prodigious further outlays for additions and improvements contributed to this effect. The increasing number of bond issues sold to bankers is further testimony to the unimpaired determination of the great railroad corporations to proceed with the work of building up their systems. While encouragement is felt at this evidence of progress in necessary financing, it does not escape comment that the rate of return on these new bond issues and the price at which they are placed argues the compulsion borrowers are under to offer more than usually attractive terms in order to enlist new capital. The extra dividend disbursement by the Lake Shore was taken to show the desire of the parent New York Central to enlist as large resources as possible from its subsidiary companies for carrying on its expensive improvement work. On the other hand, the reduced dividend of the Chicago, Rock Island and Pacific Railiway occupany dampened the hopes of the preferred stockholders of the Rock Island Holding company for sharing in distributed profits. Reports of January net earnings of railroads showed some striking discrepancies in the net return, which might be due to differences of weather conditions in their power to hamper operations.

There oney market was undisturb. ences of weather conditions in their power to hamper operations.
